FOR IMMEDIATE RELEASE

Halocarbon Locates Corporate Headquarters to Peachtree Corners

PEACHTREE CORNERS, GA, August 24, 2016 – The [Georgia Department of Economic Development](#), [Gwinnett Chamber Economic Development](#) and [City of Peachtree Corners](#) jointly announced today the news that [Halocarbon Products Corporation](#) has selected the City of Peachtree Corners for the site of its corporate headquarters.

Located at 6525 The Corners Parkway, Halocarbon is one of the world's leading producers of specialty fluorochemicals. The company decided last year to relocate from its New Jersey location to Peachtree Corners.

"The relocation makes access to our company's manufacturing site in North Augusta, South Carolina, much faster and easier while allowing Halocarbon to tap into a larger pool of innovative, collaborative and tech-savvy talent," stated David Bacon, CEO of Halocarbon in a Gwinnett Chamber release.

"The look and feel of our new headquarters reflects the evolving personality of our company: progressive, forward-looking and highly accessible," Bacon added.

Halocarbon was founded in 1950 and is a pioneer in the industry. The company has built its reputation on a long list of firsts including being the first U.S. producer of operating-room safe fluorinated anesthetics and the world's first large-scale producer of trifluoroacetic acid and trifluoroethanol. Both products are widely used to make pharmaceutical and agricultural chemicals. Halocarbon is also the first U.S. company to produce generic halothane, according to Gwinnett Chamber's release.

"Halocarbon's decision to invest in Peachtree Corners speaks to the strength of our community and the economic vitality of this area," said Mayor Mike Mason. "With access to a skilled workforce and significant infrastructure, companies like Halocarbon are able to locate their business here with confidence."

Ease of access to I-85 and Atlanta's international airport factored into the company's decision to move to Peachtree Corners said Ashley Morris, Project Manager for the Georgia Department of Economic Development.

Halocarbon is one of the world's leading producers of speciality fluorochemicals. The company's products include fluorochemicals for pharmaceutical and agricultural manufacturing, inhalation anesthetics for the human and veterinary markets, inert lubricants and other specialty products.

The privately-held company also plans to add additional staff to its Peachtree Corners location over the next one to two years.
