FOR IMMEDIATE RELEASE

Public Safety Technology Co. Establishes HQ in Peachtree Corners

Fusus, Atlanta Inno “50 on Fire” recipient, moves into expanded office space

PEACHTREE CORNERS, GA, Oct 1, 2020- Fusus, a rapidly growing public safety technology company, recently announced its move into expanded offices in Peachtree Corners and establishing its headquarters in the city. Fusus’ offices are located at 5550 Triangle Parkway.

Fusus is known in the Law Enforcement and Public Safety sphere for their leading-edge Real-Time Crime Center In The Cloud (RTC³) platform. A 2020 member of Atlanta Inno’s “50 on Fire,” Fusus was recognized as among the hottest new companies in the Atlanta area. The company has relocated to the larger office space due to rapidly increasing demand for their platform.

The Fusus RTC³ platform’s video intelligence and map-based awareness interface serves as the central integration point for Law Enforcement agencies’ surveillance, security, and life safety technology. Fusus brings all personnel and emergency operations centers under a unified umbrella that aggregates video and data, and directly integrates with 911- Computer Aided Dispatch (CAD) systems, enabling agencies to geolocate officers and units in the field via the native fususOPS app, track calls for service, and better coordinate their resources.

Law Enforcement users also have the ability to integrate AI at the Edge cameras, gunshot detection systems, automated license plate readers, a multi-media crime tips text messaging system, building floorplans, location alerts for responding officers, and a host of other utilities available on the unified public safety platform.

“The pace of adoption of our Real-Time Crime Center Platform continues to accelerate, especially among technologically progressive agencies, and we’re committed to the continued delivery of really unique and unified public safety solutions,” said Chris Lindenau, CEO of Fusus. “When we decided to scale-up our operations, Peachtree Corners was a no-brainer for us- it’s the perfect spot for us, being at the center of a rapidly evolving technology hub with great infrastructure.”

A diverse set of law enforcement agencies ranging from the Georgia Tech Police Department, the Hillsborough County Sheriff's Office and the New Hampshire Department of Safety, to Police Departments in cities like Rialto, Honolulu, Minneapolis, and Oak Lawn have all recently activated the Fusus platform to power their Real-Time Crime Centers.

Some of the primary factors driving adoption of the Fusus solution is the ability to quickly implement a robust, fully functional Real-Time Crime Center solution remotely without the need for onsite work, and the aggressive price-point of the solution, which makes it affordable for Departments located in cities suffering from budget shortfalls due to the ongoing COVID-19 pandemic.

"Peachtree Corners is pleased to welcome Fusus," said Mayor Pro Tem Weare Gratwick. "The city is known as a hub for technology-focused businesses and has a deep pool of talented work force from which Fusus can draw as it continues to expand."

Fusus celebrated the opening of its new office with an official ribbon cutting ceremony on Thursday, Oct. 1. Peachtree Corners Mayor Mike Mason, Mayor Pro Tem Weare Gratwick and Councilmember Lorri Christopher were on hand for the celebration.
